

## WOMAN'S WORLD

**THE WAY TO SHADOWTOWN.**  
Away to and fro in the twilight gray,  
This is the ferry for Shadowtown,  
It always sails at the end of day,  
Just as the darkness closes down.

Good, little head, on my shoulder—so;  
A sleepy kiss is the only fare,  
Drifting away from the world we go,  
Baby and I, in the rocking chair.

See, where the firelogs glow and spark,  
Glimmer the lights of the Shadow land,  
The raining drops on the window—  
Hark!

Are ripples lapping upon its strand,  
There, where the mirror is glancing  
dim,  
A lake lies shimmering, cool and still;  
The moon is winking, and the stars  
are twinkling over there on the window sill.

Rock slow, more slow, in the dusky  
light,  
Silently lower the anchor down,  
Dear little passenger, say "Good-  
night!"

We've reached the harbor of Shadow-  
town.  
—Eugene Field.

ROUNDING OUT THEIR  
FACES BY ELECTRICITY.

Marion Martineau in Chicago Tribune.  
It was a happy day for woman when  
the discovery was made that her face  
could be improved by electricity.

This magical power is recognized along other  
fields of physical endeavor, and it is  
well known fact that nearly all bodily  
ills can be and are constantly being  
cured by electricity.

As for the removal of superfluous  
hair, the results with the needle were  
questioned, for, with only a tiny  
tick of the needle the hair root was  
killed, never to revive nor show a hair  
through the skin again.

With the electric needle there is only  
a tiny tick of the skin, the current is  
turned on and the hair comes out on  
the tip of the needle.

But it is not with superfluous hair  
alone that electricity has to deal where  
a woman's looks are concerned, but  
with every other defect of countenance.  
And particularly is it effective in the  
case of wrinkles, which seem to yield  
like magic to electricity.

Electric Roller Acts Like Magic.  
Furrows between the eyes are re-  
moved with the electric roller and  
the face looks as if it were a smooth  
plate.

The roller, which is attached to  
an electric cord which has its own  
electrical attachments, is made to com-  
municate with a galvanic battery, and  
the sensation should be scarcely felt.  
It acts like magic, smoothing out the  
furrows and making the face round  
and plump again.

But the greatest care is necessary in  
applying electricity, first to see that  
it is not too strong, and second, that  
it is not applied in too powerful a way.  
One must use a great deal of discretion,  
along with the electric roller, and the  
sensation should be scarcely felt.  
It should certainly not be a keen one.

There is another precaution neces-  
sary in the handling of electricity, and  
this is that the skin of the face and of  
the hands, and the feet are to be  
pumped, be prepared for it.

Skin that has been chapped by the  
wind and ruffled by the sun and that  
is treated simply by being smoothed with  
water is in the worst possible condition  
for the use of electricity. The electric  
current, instead of plumping out the  
skin, will almost shrivel it, and the  
poor patient will have a face that  
resembles parchment.

Massage Skin Before Treatment.  
To keep the skin right for the elec-  
trical treatment, a massage with a  
little pulverized soap in the proportion  
of a tablespoon of the pulverized soap  
to a cup of the oil.

The whole is now mixed together, and if one  
care is not made, one may find it very  
difficult to get the skin of the face  
for the sake of the oil. Just before  
using the bag a drop of glycerine  
may be added.

The bag should be made up in thumb  
so that a bag can be made and  
thrown away, and when they are made  
they should be laid away on an airy  
shelf where they will not get damp or  
heavy in texture. The outside bag  
should be made of a material that will  
be smooth and not nearly fill it. On the  
contrary, it should be flat in shape and  
lose in texture, so that it can be  
rubbed over the face without injury.

As an outcome of the use of this kind  
should be followed by a thorough rins-  
ing with hot water, and the face is left  
soft and smooth and of good color. It is  
now ready for the application of elec-  
tricity, and in the handling of the electric  
roller will do more good than at any  
other time.

If the skin does not respond readily  
to the stimulus of the hot water and  
the external preparation, it can be fur-  
ther treated with lotion made by tak-  
ing the leaves of the sweet clover and  
steeping them in pure winter tallow,  
to which add sweet oil enough to make  
a creamy cream.

Needs Internal Treatment.  
The electric roller and the massage  
treatment are often applied in cases  
where they can do no good at all, where  
the skin is sallow and where there is  
no hope of clearing it by external treat-  
ment. Those who have the sallow skin  
should, while using the massage roller,  
keep the skin through the blood.

All the year around, and especially during  
the summer, the skin is apt to grow  
yellow if neglected, and instead of the  
pink and white glow of health, the  
skin will be a bilious yellow tone, turning  
into sallow.

For this sort of skin there must be  
a thorough internal treatment. The  
sallow complexion woman should break-  
fast upon a whey, malted milk, or as  
much watermelon as she can eat. She  
must not take coffee or if wedded to her  
cup of coffee she must not take cream  
with it, for it is pretty certain that  
coffee and cream will make the skin  
sallow.

It is for this reason that a woman  
should eat fresh fruit at night  
before going to bed, and for clearing  
the skin, fresh figs are best, not the  
sugared figs, but the round fresh figs,  
which are more plentiful at this  
time than any other. She should also  
eat apple sauce and prunes besides  
berries and fruit of all kinds.

To clear the skin when it is a yellow  
look there is that splendid skin tonic,  
phosphate of soda; and a teaspoonful  
of this taken in hot water three times  
a day, immediately before meals, will  
act like magic upon the complexion.

Tired Lines Not Cured by Massage.  
Women sometimes take up physical  
culture and facial massage for the ex-  
ercise of the tired face, and think  
the eyes and eye sacs under them. But  
it is seldom that they can be taken  
away in this manner, for the eye sacs

or twenty minutes put hot brick to feet  
and sides. Leave in the pack fifteen  
minutes to half an hour after patient  
begins to sweat. When patient is taken  
out of sweat, sponge with cold water  
at a time with cool water, wipe dry and  
rub thoroughly, so as not to take cold.

I don't think it a good plan to give  
milk, or fruit juice, or fruit juice.  
Three or four times a day, give cold  
and so forth. Give cold sponge baths  
in fever. I will close, hoping this may  
benefit some one.

Hastings, Okla. OKLAHOMAN.

Care of the Eyes.

Up to 30 years of age, bathe the eyes  
twice daily with cold water.

Avoid reading when lying down or  
when mentally or physically depressed.  
When the eyes are tired rest them  
by looking at objects from a distance.

Old persons should avoid reading  
much by artificial light; be guarded as  
to diet and avoid sitting up late at  
night.

Avoid stimulants and drugs which  
affect the nervous system, especially  
when they are known to exert an in-  
fluence on the eyes.

After 50 years of age bathe the eyes  
mornings and evenings with water so  
hot that you would wonder how you  
could stand it; follow this with cold  
water. That will make them glow with  
warmth.

Do not give up in despair when you  
are informed that a cataract is devel-  
oping. Remember that in these days  
of advancing surgery it can be re-  
moved with little danger to the vision.  
—Up-to-date.

Cure for Burns.

A girl of 11 years turned over a gal-  
lon of boiling liquid on her leg and  
foot. When the stocking was removed  
the skin came off with it, and the pain  
was intense.

She was given a strip of an old  
sheet, and having put nearly a gallon  
of soda on the limb, wrapped the sheet  
around it in such a manner as to ex-  
clude the air, bound it firmly, saturated  
it with cold water, and in fifteen min-  
utes she sat with her foot in a chair  
and joined in the other children's play.

In two days she was in school, and in  
two weeks the limb was well. It never  
swelled, and she had no pain. A bare-  
footed boy stepped on fire, and was  
almost in spasms with the pain. I  
bound on soda and cold water, and in  
less than twenty minutes he was asleep  
and had no more pain. I know it is  
the best remedy for burns.

SARAH E. WILCOX.

Home Remedy For Whooping Cough.

To the Editor: It "An Extremely  
Ugly Woman" will have her children  
dressed freely of a tea made of red clover  
blossoms (first crop is best), she will  
find them very effective in whooping cough  
very lightly, perhaps not whoop at all.

Pick the blossoms and dry in the  
shade. Take a good handful of blossoms  
to a pint of water; steep well, but  
do not let it boil. Give the children drink  
freely as often as you can get them to  
do so. It is also a good tonic and blood  
purifier, and if taken long enough will  
cure cancer.

For summer complaint in children,  
take six green persimmons, cut in  
halves, steep in pint of water. Give a  
teaspoonful at intervals until better. It  
is an astringent and perfectly harm-  
less. This recipe is given by an old  
physician and is reliable.

For sprains take a teacup of coal oil,  
put on stove and boil. When it bubbles  
and smokes put 10 cents' worth of gum  
camphor, boil and let it boil for some  
time. Use the sprain in flannel cloth.  
Keep soaked with the liniment and in  
two days you will forget that you had  
a sprain. It is also fine for rheuma-  
tism.

For chapped hands and better use  
camphor ice freely. I could tell you of  
a better remedy, but it would be an  
advertisement, so of course I can't.

A MONTANA READER.

Kitchen and Table

**THE SUNDAY MENU.**  
BREAKFAST.  
Cereal and Cream.  
Muskmelon. Scrambled Eggs.  
Lyonnais Potatoes. Coffee.

DINNER.  
Celery Soup.  
Braised Breast of Veal. Jelly.  
Boiled Rice. Capers. Mushrooms.  
Green Corn. Lettuce Salad.  
Peach Ice Cream. Lady Fingers.  
Black Coffee.

SUPPER.  
Scalloped Potatoes with Onion.  
Sardines. Pot Cheese. Graham Bread.  
Cake with Maple Filling.  
Fruit Salad. Tea.

**Canning.**  
"I can almost everything," says a  
clever housewife. "This is my last  
venture." She had just opened a can  
of chicken, and five minutes later she  
found it was ready to eat. It was just  
as if it had just been cooked. "It's the  
simplest thing in the world. I just take  
the bones out, put the meat in the can,  
fill up with the liquor and when the  
canning is done, the meat is ready to  
eat. I fill the can with water; sweet corn  
and tomatoes do not. I put them into a  
kettle sufficiently filled with water to  
reach within an inch of the top of the  
jar, and place the covers on, although  
they must not be screwed. Boil about  
three hours. Squash I cook the same as  
for pie; fill the jars and place the  
canning on the fire for about an hour.  
As most people know, rhubarb can  
admirably be simply filling the jar up  
with cold water, sealing and putting  
away.

"String beans and green peas are  
canned in the same manner, so if I give  
you a recipe for the former it will ser-  
vice also for the latter. I think I  
should tell you that the green beans  
are to be fermented and spiced than  
beans. By the addition of a little sal-  
icylic acid you may prevent this fer-  
mentation, but the effect on the consumer  
is injurious. Many persons use it, but  
such use is to be condemned. Remove  
the strings and add the beans into a  
kettle. Put into the water a salt and  
boiling water and boil until tender.  
Set glass jars in a pan of boiling  
water on the range, remove the beans  
from the liquid, pack them in the hot  
jars, being sure that the water is hot.  
The beans are cooked to a hard boil, fill  
the jars to overflowing with this, and  
immediately screw on the air-tight  
tops. Keep in a cool, dry place.

Canned Cucumbers—Cut and slice  
thin medium-sized cucumbers, sprinkle  
with salt and a little alum; let stand  
two hours; drain and put in jars, add-  
ing vinegar enough to cover, pepper  
and a few whole mustard seeds, the  
quantity of pepper to be governed by  
the taste, and the whole pepper to be  
used in preference to the ground. On  
the top of the jar when ready for sealing  
add a despoisoned spoonful of olive oil. Good  
to serve with meat, fish or salad; will  
keep until June.

Canned Peas—Shell ripe peas and lay  
them in cold water for an hour. Drain  
cover with cold salted water and bring  
to a boil. Boil until tender, but not  
broken. Set the cans in hot water,  
drain the peas from the liquid, cover with  
the liquor to the fire, fill the cans with  
the peas, and when the liquor boils  
again fill the cans to overflowing with  
the boiling liquid. Screw on the tops  
immediately.

Canned Lima Beans—Boil the beans  
until tender, but not soft. Season with  
salt, pour the superfluous liquid and  
pour the beans and remaining liquid,  
boiling hot, into the cans until they  
overflow, then seal.

Canned Tomatoes—Scald ripe, firm  
tomatoes, then peel. Pack the tomatoes  
in glass jars, making sure that the  
jars are covered with water. Seal the  
jars and the jars themselves scrup-  
ulously clean. Put half a teaspoonful  
of salt in each jar of tomatoes, then

fill with cold water to overflowing, put  
the jars in a pan of boiling water, and  
boil for two hours. Remove the jars  
from the water, and when the liquid  
boils again fill the cans to overflowing  
with the boiling liquid. Screw on the  
tops immediately.

For typhoid fever, I send the following  
remedy to "Everybody's Friend":  
For typhoid fever give a pack sweet  
as described below.

Two or three comfortable, one woolen  
blanket or a large linen or cotton  
sheet are needed. Have the sheet long  
enough to go around the person's body  
twice. Spread the comfortable on the  
bed, making them even at the top;  
then spread the woolen blanket over  
the sheet, allowing its upper edge to fall an inch  
or two below that of the last com-  
fortable. Wet the sheet in hot water,  
as hot as can be borne by the hands,  
having gathered the ends so that it will  
quickly spread out. Wring so that it  
will not drip much; place its upper end  
even with the woolen blanket and  
spread out on each side of the middle  
of the sheet, taking care to bring it  
in contact with as much of the body  
as possible, bringing it closely up  
beneath the arms and pressing it down  
between the limbs so as to make it  
come in contact with both sides of the  
limbs. Tuck the edge lightly under the  
patient on the opposite side, using care  
not to include the other edges of the  
sheet.

Now let the patient clasp his hands  
across his chest, and then bring up by  
the other side of the sheet, grasp it by  
its upper corner with one hand, drawing it  
down over the patient's head, and tuck  
the edge of the sheet under the body  
carefully, enveloping the feet; then bring  
over each side of the comfortable and  
blanket in the manner last described,  
being careful to include all parts of  
the body, neck, shoulders, arms, and  
feet, and to extend below the feet so that  
they can fold under.

If patient does not sweat in fifteen

Wonderful Automaton

A Clock Which Answers the Question "What Time It Is."

"FEW persons in the mechanical  
world have not heard of the au-  
tomatons of the famous Neuchâtel  
mechanician of the eighteenth century."

Most people would not know where to  
find automaton of Jaquet-Droz. They  
are said to be in Russia, in England and  
scattered here and there throughout the  
world. But the most beautiful of these  
masterpieces are in the possession of Mr.  
Henri Martin of Dresden, where they are  
the admiration of all those who happen  
to visit Dresden and are able to examine  
them.

According to the information kind-  
ly furnished us by Mr. Martin, the au-  
tomatons are in good condition and work  
as well as at the time when Jaquet-Droz  
created them. The automaton of France,  
Spain and England, though now they  
must be put in operation by hand.
